**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 29 May 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plurality of electromagnets formed having different geometrical group cell patterns on the fixed plate as required by claim 1 must be shown, the group cell patterns including triangular, pentagonal, and hexagonal array pattern of claims 4 and 5, the group cell pattern disposed along an outer perimeter of the fixed plate and a second group cell pattern disposed within a center portion of the fixed plate as required by claims 9 and 13, and the geometrical group cell patterns including a first group cell pattern disposed along even-numbered rows, and a second group cell pattern disposed along odd-numbered rows must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. (It should be noted that the Brief Description of the Drawings should be amended to include description of newly added figures.)

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The specification does not provide proper antecedent basis for the combination of different cell patterns where the cell patterns are triangular, pentagonal and hexagonal. (It should be noted that original claims 4 and 5 provided support for such as possibility).

***Allowable Subject Matter***

Claims 1-16 allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-16 are indicated as being allowable over the prior art of record because the prior art of record does not teach a plurality of electromagnets having different geometrical patterns on a fixed plate on a side of a sputtering target.

***Response to Arguments***

Applicant's arguments filed 5-29-03 have been fully considered but they are not persuasive.

Applicant's arguments have been considered. As discussed above the prior art does not suggest a plurality of electromagnets having different geometrical patterns on a fixed plate on a side of a sputtering target. New objections have been raised with regards to the drawings and specification. The examiner awaits Applicant's response to the new objections.

This action is made NON-Final based on the new objections.
